Did you know that reading to children is important and vital to their development? Lucky for us, a preschooler's curiosity and imagination make this the perfect age to lay a solid foundation for literacy skills. Each week the children will study an author or theme through books. They will bring the stories to life with a blend of interactive lessons and making connections using games, science, song, art, culinary and hands on experiences. Watch in awe as their vocabulary and reading skills continue to develop. In the words of Margaret Fuller, American author and educator, "Today a reader, tomorrow a leader." Come join us! This is a very special program designed specifically for the inquiring minds of preschoolers. For children, art is a gateway to their imaginations. Where we see circles, squiggly lines and dots, they see images and stories. Our program will help their imagination come to life and express their natural creative ability! Your child will have the opportunity to develop their fine motor skills while discovering colors and shapes using various artistic media. Each week a famous artist will be highlighted and the children will create their own interpretation of the famous artist's work. Be sure to provide some wall space at home for their finished products!
